The Rush Center for Excellence on Disparities in HIV and Aging (CEDHA) in collaboration with the Rush Alzheimer’s Disease Center (RADC) is offering an internship program for highly motivated high school and undergraduate college students with strong interests in research, aging and health disparities, and community relations. The 8-week, multi-faceted experience is designed to give relevant and needed exposure to students seeking careers in the health sciences and research.

Learn skills used by researchers to address health disparities by conducting your own research study on aging and minority health.

Learn how to conduct research through weekly discussion groups, workshops, and field observations.

Conduct an independent research project centered on aging and minority health using CEDHA data.

Explore careers in research and healthcare at a multi-disciplinary center.

Participate in community engagement through tours, shadowing, and outreach.

Gain knowledge from faculty on health disparities, epidemiology, and statistics.

Internship qualifications include:
- Current enrollment in a high school or undergraduate degree program
- Commit to attend internship full-time, starting June 24 until August 16, at Rush University Medical Center in Chicago, IL
- Strong interest in pursuing a career in the health sciences, health disparities, and research
- Strong written and verbal communication skills
- Computer proficiency with Word, PowerPoint, and Excel

APPLICATION PERIOD ENDS MARCH 3, 2019
